SUMMARY

Data scientist with **3+ years at SoftBank** (experimentation, **causal inference**, retention analytics on 200K+ customer records) and **LLM-evaluation researcher at USC ISI**, focused on measuring and mitigating biased and unsafe model behavior.

EDUCATION

University of Southern California, Los Angeles, CA Expected May 2027
M.S. in Computer Science (Applied Data Science) | GPA 3.92

California Polytechnic State University, San Luis Obispo, CA June 2021
B.S. in Business Administration (Information Systems), Minor in Statistics | GPA 3.63

EXPERIENCE

USC Information Sciences Institute (ISI) — Student Researcher, Trustworthy AI May 2026 – Present

- Designed a controlled experiment on 2024 California **HMDA** mortgage data testing whether **emotional prompt framing** shifts **LLM** lending decisions across **6 models** (GPT, Gemini, Claude, Qwen, Llama, Gemma); n=300 per model-condition, **chi-square/Fisher tests**.
- Found emotional framing flipped Claude Haiku 4.5 from **66/300 favorable decisions to 0/300**, triggered Gemini guardrails, and lowered GPT confidence without changing answers.
- Built the batch-inference and **evaluation pipeline (Python, llama.cpp)** on USC compute cluster, **logistic-regression** bias controls); co-authoring a paper with a PhD student.

Datify — Founder / AI Product Developer Apr 2025 – Present

- Shipped **HealthSync**, an **iOS** health-advisor app (**Swift, Apple HealthKit, Azure OpenAI GPT-4o**) with **~60 TestFlight users**; converts 6 months of biometric data into structured summaries for LLM-generated advice.

SoftBank — Data Scientist & Technical Project Manager Apr 2022 – May 2024

- Analyzed **200K gym-member records** across **150+ branches (Python, R, SQL)**; found a 3-month weight-regain pattern in younger members and designed retention interventions.
- Launched a churn-risk notification service for members with declining attendance, lifting re-engagement rate by **30%**.
- Ran a **Difference-in-Differences** study on ticketing data for a **50-person engineering org**; traced bottlenecks to resource allocation and drove changes that raised productivity by **35%**.
- Led a **30-engineer** multinational **Agile** team as technical PM on **AWS/Azure** client solutions; shipped a contactless health-check system and virtual-office platform, raising employee engagement by **40%**.

SoftBank — Data Scientist (Contract) Mar 2021 – Mar 2022

- Led trade-area analysis for 190+ shopping malls (Izumi Co.) in SoftBank's **Smart City** program using **GPS** mobility data (**~4M devices**, ~1K pings/day, 3 months), demographic data, and **Yahoo! JAPAN** search data.
- Built **Tableau** dashboards used by **15 client stakeholders**; recommendations on targeted ads and loyalty programs led SoftBank to form a dedicated trade-area analysis team.

PROJECTS

News-to-Podcast Platform — USC AI4SE Hackathon, Participants' Choice | Django, RAG, Ollama Jul 2026

- Conceived and led a 2-person team; built the database, ingestion scripts, **per-listener episode ranking**, and fine-tuned the **TTS/LLM** stack for a live app with 10 users.

Ask Me — RAG Career Chatbot | AWS Bedrock, Kendra, S3, Amplify, TypeScript | [Demo](#) Feb 2025

- Built a RAG chatbot over personal resume, project, and blog content using an AWS Bedrock Knowledge Base with Kendra retrieval and an S3 document store, deployed via AWS Amplify, so recruiters can ask natural-language questions about background and experience.

HONORS

Participants' Choice Award — USC AI4SE Hackathon Jul 2026

Outstanding New Employee Recognition — SoftBank Oct 2022

Top 10 of 110+, SoftBank AI Competition — seasonal ARIMA population-flow forecaster, MAPE 5.78% Oct 2020

TECHNICAL SKILLS

Languages: Python (pandas, NumPy, scikit-learn, PyTorch), SQL, R (tidyverse, ggplot2), Swift, TypeScript

Statistics & ML: A/B testing, causal inference (DiD), time-series forecasting (ARIMA), regression, XGBoost, random forest, clustering, hierarchical linear models

LLM & NLP: LLM evaluation, prompt engineering, RAG (AWS Bedrock, Kendra), Hugging Face Transformers, llama.cpp/Ollama, Promptfoo

Data & Cloud: AWS (S3, Bedrock, Amplify), Azure OpenAI, GCP, Spark, Tableau, Power BI, Git, GitLab CI/CD, HPC
